MULTI-TEKNIK
PART OF NCAB GROUP

ENVIRONMENTAL POLICY

The company makes its decisions based on a balance between what is environmentally motivated, technically possible and financially reasonable. The environment management system shall prevent pollution, protect our environment and comply with all relevant legislation.
In order to minimize its impact on the environment the company shall always seek to improve systems and routines, especially with regards to means of transport.

With our knowledge in the field of circuit boards can we, in cooperation with our customers, minimize our impact on the environment by more efficient use of materials, better choice of materials and minimizing waste.
The company expects all employees to contribute to the improvement of the environment management system. The company shall encourage and support all employees in their daily work to identity risks, errors and parts that can be improved.
